

About Hunt 4 Life

Hunt 4 Life is a charity society, which will gratefully receive your donation:

- ... of GAME & domestic animal produce, to be distributed to one of our reputable associated charity organizations, such as the SAVF.
- hunting opportunity donations, which will be used by one of our hunting patrons in various means, of which the produce will distributed to one of our reputable associated charity organizations.

The **Hunt 4 Life** society, supporting and promoting minority groups such as lady and youth nature ambassadors & hunting patrons in support of traditional and cultural sustainable subsistence hunting as a function of nature conservation to support life and spirit.

Hunt 4 Life is a Life wellness philosophy, a code of good Life conduct, in everyday Life, including nature conservation and hunting as a function. In the Big Picture - it is a collective energy and intelligence, for responsible and sustainable Life on Earth in all industries, in all walks of life.

Hunt 4 Life support hunting, as a function (task) to (literally) manage and sustain life, as a means to the end of responsible natural resource management through nature conservation of our fauna and flora.

Hunt 4 Life and all associated donors and beneficiaries subscribe to a strict ethical code of conduct and hunting etiquette guidelines. The principal is: "We are humans; therefore we shall hunt as humanely as possible and we shall not waste". We have a zero tolerance ethical code compliance policy.

Our human species was created to rule the earth, we evolved & positioned ourselves deliberately at the pinnacle of life (the of food chain and the dominant predator), deliberately manipulating nature's natural life cycles and events, with fences, food sources, water restrictions, breeding herds – and prohibiting herd migration and natural predators, and expanding and extending game life expectancy. As responsible humans, we have to accept the accountability and the duty of our pinnacle status, and understand that we are the keepers and predators to aging and frail animals, that animal overpopulation must be managed by us, because we are caring and considerate humans.

The human species, have the luxury of choosing our destiny and interests, and some may choose – "not to hunt", but the animals in our care do not deserve to suffer and die of infirmity,

overpopulation or starvation. Nature - is the responsibility of every human citizen on planet earth, you cannot dispose and deny your fundamental accountability and liability for which ever reasons, personal, moral, ethical, political or religious convictions or impasse. As an individual's we may not elect to "hunt" or "cull" personally, but we should accept, respect and support people that act on our behalf, in a responsible ethical manner, as we are the arbitrator of our sanctity.

Hunt 4 Life does not support – "Hunting for Sports". However, if any person enjoys what they do, then- they take pride in their duty, and – they are diligent and considerate in their actions. There is much to be enjoyed about greater hunting experience, and the act of killing is incidental for the true hunter.

Irrespective of your religious convictions, you are answerable to the Maker of the cosmos, the fauna and flora, and - when you point a weapon at any form of life, be sure to guide your actions by these tenets.

Hunt 4 Life accept that commercial game farming & professional game culling and hunting safari's operators and clients, supports the principle of Hunting for Life (on a grander scale) and is a force major in natural resource management and nature conservation to sustain life and create the opportunity for subsistence and occasional hunters for a greater good of the community.

Hunt 4 Life is opposed wildlife, commercial or domestic animal cruelty.

Popular - **Hunt 4 Life** – Facebook & Instagram - video "shout outs"!

- 1) I love Hunt 4 Life - for Life!
- 2) I am (name (& surname) for Hunt 4 Life!
- 3) I am (name (& surname) – here at (name of place) and I support Hunt 4 Life
- 4) I support nature conservation – I support Hunt 4 Life
- 5) I support ethical hunting - I support Hunt 4 Life
- 6) I support sustainable hunting – Hunt 4 Life
- 7) I support Hunt 4 Life!

Frequently asked questions

How do I donate?

- 1) Members of the public can donate funds. <link> The minimum donation is R35-00 which translates to 1 kg of game meat, effectively the meat (mince / protein) for 5 to 7 meals at a care facility. <link>
- 2) Hunters – can donate carcasses or processed meat (mince). <link>
- 3) Game farmers / Commercial hunters – can donate (A) carcasses or processed meat (mince). <link> OR (B) – can donate animals / game hunting packages to be used by Hunt4Life Hunting Patrons <link>
- 4) Contribute in your own community. Support the Hunt4Life drive. You do not have to physically deliver the produce to an accredited H4L depot (butchery), you may manage the process yourself since you know your community best. Here is How! <link>

Are you a charity?

Hunt4 Life is a chapter of the St Christophe Foundation (SCF) a Society registered as a Non-Profit Organization (NGO) and accredited as a charity in South Africa. SCF can provide donor tax certificates in compliance with SA Revenue Services (SARS). <link>

Do you accept “domestic animal produce / products” donations?

Yes we do, if raw unprocessed - beef, since our output is primarily mince, Sheep / Pork, our output diced and cubed, and chicken portions. We accept processed meats, such as cold meats, polony , sausages etc. <link>

Do you accept “fresh or processed crop” donations?

We will never say no! Fresh or pre-packed vegetable crops are always welcome. <link>

Why is game meat best?

Because it REALLY is FREE ROAMING! It is a modern lifestyle and a cultural choice. Game (venison) produce (venison meat / protein) are very healthy, contains NO Antibiotics & Steroids, high meat protein yield per kilogram since it very low on fat content and cholesterol. It is the ideal natural healthy meat for humans. Why be limited to Beef, Chicken, Lamb, Pork, if there is a large variety of meats such as Ostrich, Springbuck, Blesbuck, Koedoe, Wildebeest, Eland and many more. Smart people eat game meat products, because it is very healthy. Be spoilt for choice.

Why are you killing animals?

All meat is produced from animals, domestic commercial animals – such as Beef (mince, steaks, wors / and patties in McDonalds’ / Burger King / Steers etc) and pigs (pork, bacon, spareribs (Spur), etc), Sheep (Lamb tjops), Chickens (Kentucky / Soul food ...), etc. These animals are killed in various ways, by the millions at abattoirs. Game animals are free roaming, they are not in pens, coops or cages and they need to be hunted (killed from a distance) to sustain “free roaming” and not to stress the animals. Game animals on game farms are managed natural resources, for the purpose to yield

a produce. But the fish harvested (are killed) from the oceans, like tuna, sardines, wales, sharks took no effort in producing and are simply harvested.

How is game meat used?

Hunt 4 Life process (mince and dice) our meat donations, since it is the most practical and user-friendly for our end-users (old age homes) which is easily made into a variety of dishes.

In general, most game meat can be used in the same dished as you would domestic meats, such as Pork, Lamb, Beef. Just as pork has a different texture and taste to beef, so does different game meat, differ in taste and texture and suitability for certain dishes. Game meat is widely used in commercial processed and prepared products in large chain stores, such as wors (sausage) as a supplement and filler. You can do anything – from making biltong and droëwors, cook meals, braai, and process it into anything from cheese grillers to the best tasting Salami!

... thank you for your generous donation!

... thank you for volunteering!

... thank you for your support!
